

SERVICES FOR CORPORATE CLIENTS

Effective, Ethical Services and Solutions

Orion provides investigative support services to local and international corporate clients in order to assist them in protecting their assets, brand, reputation and revenues.

Investigation services that could be of interest to you and your organization include:-

Due Diligence

Extensive research into the background of individuals and organizations, for example, potential business partners. Look behind the resume when hiring. Dig deeper when considering business partnerships, acquisitions or investments. Helps to mitigate risk.

Computer Forensics

Electronic data evidence gathering to uncover evidence lost to usual sources. Cutting edge tools and forensically sound methods provide dependable evidence. Testimony from professionals experienced in working alongside law enforcement agencies helps you build a compelling case against internal or external threats.

Intellectual Property Infringement

Protect your revenues and brand reputation. Market surveys to identify retail outlets and determine availability of counterfeit items. Lead generation through our network of informants. Investigations to locate importers, warehouses and manufacturing facilities.

Corporate Fraud & Theft

Are you a victim of internal or external fraud, theft of assets or theft of information and intellectual property? If you are already aware of an incident we can investigate. If you are unsure we can assess the potential risk and recommend preventative measures or investigate further.

Employee Misconduct

There is a high burden of proof on organizations which terminate their employees' contracts. We can help you uncover and collect the required evidence to strengthen your case and justify such contract terminations.

Surveillance & Counter Surveillance

Our highly trained and effective surveillance teams are capable of remarkable results. Counter surveillance measures such as electronic sweeps and physical surveillance help determine whether other people are following you, your staff or your assets so you can take appropriate action.

Insurance Claim Investigations

Our investigators can conduct detailed investigations into insurance claims such as worker compensation, accidents, health insurance, theft insurance and life insurance. This service helps to reduce the chances of insurers paying for false claims, thereby keeping operating margins higher and legitimate customers happy with potentially lower premiums.
